CASIO

XJ-A130 • XJ-A140 • XJ-A240

Green Slim Projectors

With a new hybrid light source, Casio's Green Slim projectors set an entirely new environmental standard. The Green Slim is an earth-friendly, low maintenance projector which eliminates the need for a short life (2000 hours typical) mercury lamp and disposal. The Green Slim's lamp-free design allows them to go 20,000 hours without having to change a lamp. Plus, while the performance of conventional projector mercury lamps falls off visibly with increasing age, the Green Slim projectors maintain consistent brightness and superior color. Combining long-life laser and LED technology the solid state light source output remains constantly brilliant producing brilliant, clear and impressive images throughout their whole 20,000-hour life. Best of all, the lamp free design is backed by a 3-year warranty including 3 years or 6000 hours on the light source.

- High-brightness projection is achieved by using blue light emitted by a blue laser, green light converted from blue laser light with a fluorescent element, and light emitted by a high-lumen red LED through a DLP chip onto the screen.
- Projection at maximum brightness is possible in a minimum of eight seconds, and no cool down is needed when turning the projectors off. Thus, limited presentation time can be utilized effectively by enabling a smooth presentation flow from set-up to clean-up.
- The laser & LED hybrid light source greatly improves color purity. Enables the production of beautifully vivid colors and projects clear, powerful images with visual effects of high color purity.
- Slim (1.7") and lightweight (5 lbs) in a standard paper-size body
- Wide-angle 2X optical zoom provides the greatest magnification of any data projector. They are also equipped with automatic vertical distortion correction.
- HDMI input enables easy connection HDMI equipped AV devices and PCs

XJ-A245U DLP Green Slim Projector

With 2500 lumens and 1800:1 contrast ratio the XJ-A245U possesses the power to project vivid, saturated pictures in a variety of lighting situations. Combining laser and LED technology creates amazing high brightness, which can last up to 20,000 hours of use. Networking technology allows for the monitoring and managing of one or more projectors from a remote location. 2X power zoom lens gives you the flexibility to easily position the projector. Wireless LAN IEEE 802.11b/g/n adapter is available.

BenQ

SP890 Full HD DLP Projector

With Full HD (1920 x 1080) resolution and 4000 lumens of brightness at 150,000:1 contrast ratio, the SP890 creates a unique theater experience wherever it's used. The SP890 can deliver 720p, 1080i and 1080p/60/50/24 high definition signals from a satellite, a cable box and Blu-ray discs. And those images will stay in pristine digital form thanks to its two HDMI 1.3 inputs. Hollywood Quality Video (HQV) by IDT makes even 480i signals look almost as good as high definition.

#BESP890 ..... **Call or Log-on**

Optoma

EW-330 WXGA DLP Projector

Perfect for the mobile presenter, the EW330 is the ideal "grab and go" solution. Just 2.4 lbs. with 2000:1 contrast ratio and 2200 lumens, it is of the lightest and brightest digital projectors yet. Connections include HDMI, VGA, s-video, composite video and USB. Up to 5000 hours lamp life.

#OPEW330 ..... **Call or Log-on**

BenQ

MP-776ST XGA DLP Projector

Boasts high contrast ratio of 2400:1 and 3500 lumens. 3D Color Management lets users independently adjust the hue, grain, and saturation levels of all six color wheel tones. Sophisticated lamp lighting technology dynamically adapts lamp output to each image/scene with millisecond precision so as to optimize brightness, color correction, and dark detail definition. For convenience, it features automatic keystone and two builtin 5W speakers.

Visual Presenter with Built-in Mic

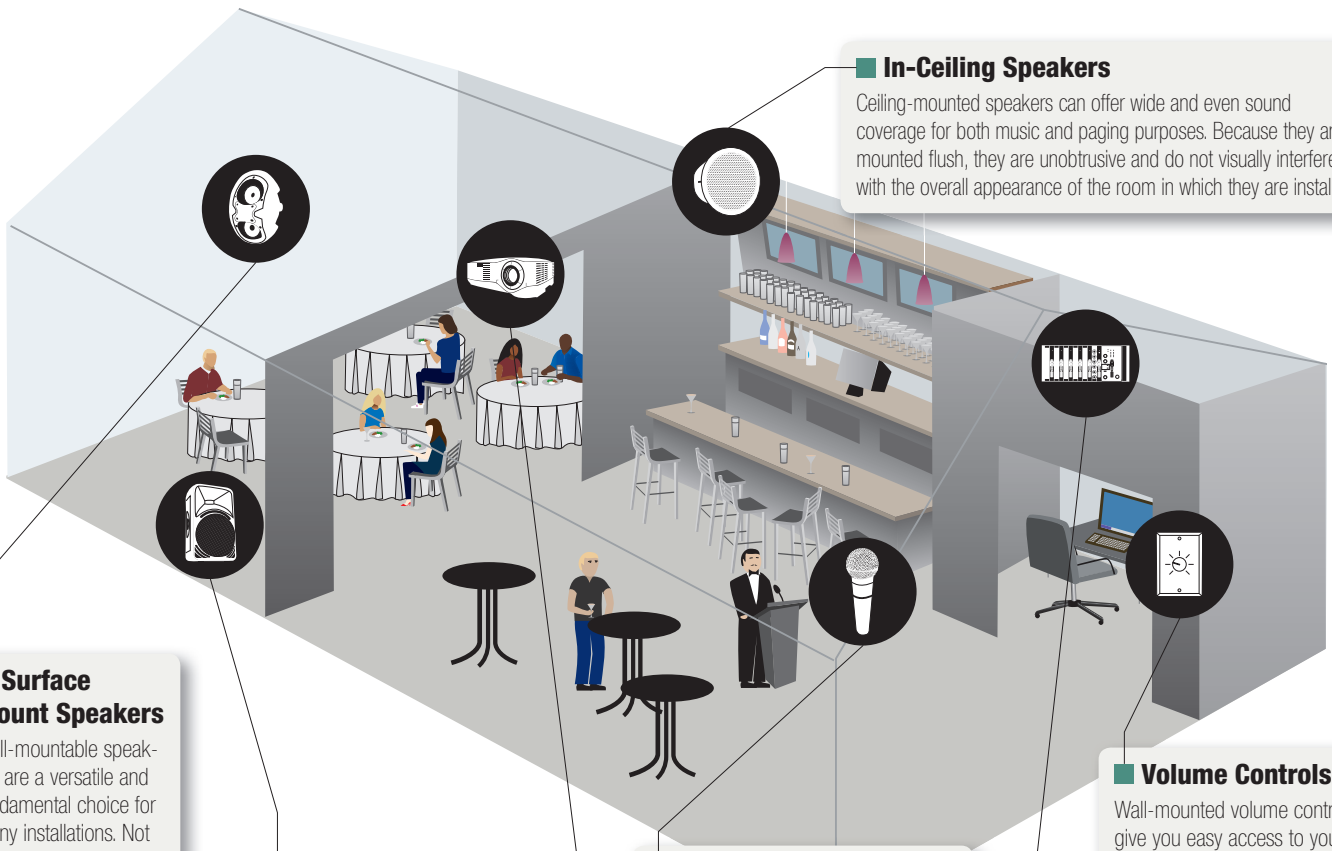
Provides images and microphone capabilities via a USB cable that plugs into your computer or RCA video connector. View, capture, edit, and share images.

- Flexible 20" neck and rugged, sturdy base
- Head also rotates 180 degrees • USB 2.0 Driver software for PC or Mac

#BUVP20M **$299.95**

MULTIMEDIA FOR THE MIX MASTER

A/V presentations are made in conference rooms, auditoriums, lecture halls, and even outdoors. The right gear means the difference between having your attendees leave well-informed or confused and irritated. It all depends on where the presentation is being made, the size and type of audience, whether indoors or out, and business or pleasure. You'll need more oomph and pizzazz (watts) at weddings, trade shows, and block parties than you'll need at business meetings or quiet restaurants.



In-Ceiling Speakers

Ceiling-mounted speakers can offer wide and even sound coverage for both music and paging purposes. Because they are mounted flush, they are unobtrusive and do not visually interfere with the overall appearance of the room in which they are installed.

Surface mount Speakers

Wall-mountable speakers are a versatile and fundamental choice for many installations. Not only do they come in a wide variety of sizes and configurations to fit almost any situation, but the angle of their placement can usually be adjusted for maximum effectiveness.

Loudspeakers

Housed in rugged injection-molded cabinets, loudspeakers are ideal for front-of-house and monitor applications, in both permanent and temporary installations. Mounted on stands or using fly points with bar handles, these need to be powerful enough to reach your entire audience. Outdoor use typically requires more power than indoors.

Microphone

A microphone will allow you to page patrons, make announcements, and present speeches. Gooseneck, desktop, and handheld mics are just a few of many other ideal installation choices.

Volume Controls

Wall-mounted volume controls give you easy access to your sound levels when they are placed in logical locations throughout your installation. Some models even offer complete on/off zone control and paging-level maximization.

Projector

These are used to show video, stills, and slide shows on a big screen. Small portable units are best for use on the road, while the larger and brighter units are better for permanent installations. You'll need extra brightness for presentations in well-lit environments.

Distribution Amplifier/Mixer

You'll need a way to mix incoming signal sources and route them to your choice of destination zones. Some models combine distribution, mixing, voice ducking, and amplification into one convenient unit.

DN-C615
DENON

Professional CD and CD-R/RW Player with MP3 Decoder

The DN-C615 is an affordable single-tray CD player with a host of features normally found on much higher-priced units. Ideal solution for schools, churches, small radio stations, and small venues.

- Low-cost professional CD player with Instant Start
- Coaxial S/PDIF output
- 2U rack-mount chassis
- CD-R/RW/MP3 Playback compatibility
- Pitch control ±12%

#DEDNC615 ..... **$299.00**
